

# CLOUD MIGRATION ROADMAP

AMERICAN  
TECHNOLOGY  
SPECIALISTS

- 1** Check to see if your applications can run in the cloud
- 2** See if there is a cloud version of the line of business application you could upgrade to
- 3** Consider migration costs
- 4** Check your infrastructure to see how it can be modified to adjust to a cloud environment
- 5** Determine how migration might affect your employees and clients, both pros and cons
- 6** Create a migration plan, it's more than flipping an on switch
- 7** Prioritize which applications to move first
- 8** Test the plan, and test some more
- 9** Have a plan of action to monitor your cloud environment
- 10** Don't overlook ongoing security of your cloud environment
